EDUCATION

University of California, Davis — *B.S. in Computer Science*

OCTOBER 2014 - MARCH 2019 | GPA: 3.5

EXPERIENCE

Kilpatrick Townsend & Stockton LLP — *Patent Engineer*

SEPTEMBER 2019 - PRESENT

- Draft patent applications that detail the technological features of an invention for the Electronic Engineering & Software team
- Able to work on cases that utilize a variety of technologies (Fintech, Deep Learning, Blockchain, etc.)

theCoderSchool — *Code Coach*

SEPTEMBER 2018 - JULY 2019

- Taught kids (ages 7-16) core programming concepts in Scratch, Python, and Java
- Assessed individual progress and interests to create specialized lesson plans that kept students engaged while still conveying important concepts and material

Zoho — *Software Engineer Intern*

JULY 2018 - AUGUST 2018

- Utilized REST API to both upload and retrieve data to and from a third-party application
- Implemented bidirectional syncing of tasks between a third-party application and Zoho CRM
- Worked in a team setting using nodeJS and Javascript to create two functional widgets that served as the overall user interface for the extension
- Had the opportunity to present the final extension to a group of engineers and the company president

PROJECTS

FluTracker — *iOS Application*

- Utilized FluTrack.org's REST API to display information about nearby locations in which possible flu symptoms were reported
- Used BetterDoctor API to list nearby doctors as well as their contact information

CryptoWallet — *iOS Application*

- Developed an encrypted virtual "wallet" via a phone number verification API
- Allowed all verified users to make transactions (ex. deposits/withdrawals)

TECHNICAL SKILLS

- Java
- Python
- C/C++
- Swift
- Unix
- HTML/CSS
- Javascript
- Git
